# **ATTACHMENT 1**

# Closing Northeast Travis County landfills too soon may have an impact on you.

## 1 Very soon, Southeast Travis County could have our region's only landfill.

Currently, our region uses several landfills to handle every piece of residential and commercial garbage, but these landfills could close as early as 2010.

## 2 Truck traffic could increase in Southeast Travis County.

If Southeast Travis County must accommodate the waste needs of our entire region, garbage truck traffic will increase dramatically. This could result in over **2 trucks every minute** headed to the one remaining landfill, located in Southeast Travis County.

## 3 Your costs could increase.

When competition is reduced, your costs usually increase. This means **higher trash fees** for you. Unless other landfill sites are developed or the operational life of existing landfills is extended, all the trucks carrying our waste will likely have to travel to the one remaining landfill located in Southeast Travis County.
